Garden Treasures

Grown by

D. J. W. CHANDLER

TECOMA, near Belgrave
VICTORIA - AUSTRALIA

Introduction

In presenting this new and revised catalogue of Trees and Shrubs it affords me pleasure to have the opportunity of again acknowledging the generous patronage and recommendation of my customers and friends, and the increasing recognition of my efforts to give satisfaction.

I exercise the greatest care in cultivation and all our stock is regularly transplanted so as to ensure safety when finally planted.

So greatly has interest in shrub and flower-growing increased that I have been encouraged to import extensively and have introduced in this catalogue finest and rarest trees and plants obtainable.

I would state that owing to the demand, some of the rarer shrubs are of rather small size but this, however, is an advantage to their later establishment when moved.

Visitors are welcome at the nursery whether customers or not and I cordially invite inspection of my stock.

I shall be pleased to give advice on any horticultural subjects and gladly reply to enquiries and assist in any way possible without fee or obligation.

No order is too small or too large and all receive the same scrupulous care and attention.

In concluding I would once more solicit a continuance of the esteemed patronage accorded me and assure you that I will endeavour to merit the confidence so valued in the past.

D. J. W. CHANDLER
Tecoma, (Near Belgrave)
Victoria, Aust.

Phone: Belgrave 65.

Also Box 2128, G.P.O., Melbourne.

DIRECTIONS—Visitors coming by car will find no difficulty in finding the Nursery—"The Ridge"—which is within quarter of a mile from the main road. McNichol Road is a right hand turn. On leaving the city take Burwood Road on into Ferntree Gully.

The U.S. Service Cars leaves Whight's Tourist Bureau every hour and will bring visitors to the Nursery.

Trees and Shrubs

ABELIA chinensis, evergreen shrub with rose and white flowers, red calyx, which remains on the plants after flowering; sunny position .. 1/6

Schumanni, this Abelia is one of the most noteworthy introductions; its long-flowering period (about four months), its hardiness, and its ability to thrive under most conditions should make this a popular shrub in our gardens; it grows from 5 feet to 8 feet high, forming a neat pendulous bush; the blush-pink flowers are shaped like those of a *Pentstemon*, and are accompanied by red, leafy bracts which add considerably to its attractiveness 2/6

ABUTILON (Chinese Lantern), hardy shrubs which require regular pruning after flowering. The following are outstanding:—

Frazeri a new variety raised in N.Z., large open bells, apricot-orange, with veinings of flame. The finest of all Abutilons .. 2/6 and 3/6

Sydney belle, rich yellow with large blooms of good shape ... 2/6

vitifolium, fast growing variety with pale blue flowers varying in intensity according to the season. Rare 3/6

ACER. The Maples are an extensive and very ornamental genus, widely distributed throughout the new and old world. Their leaves differ much in form, some are simple and entire, others deeply lobed, whilst some have compound leaves. Variations in form and colour of foliage are very striking, rich pink, crimson, and yellow colourings are especially conspicuous during summer and autumn. Some species are attractive on account of the striated markings of their stems. Maples, although not particular as to soil, respond to liberal treatment.

colchicum rubrum, foliage reddish purple, very fine ... 2/- to 3/6

Davidi, a rare Chinese species, with beautifully striated bark; leaves entirely dark green; wonderful Autumn tints ... 2/6

negundo argenteum variegatum (Ghost Tree), a pretty variegated tree with large, pale green leaves, margined and marked with white 2/- and 3/6

negundo aureum variegatum, similar to the above, but with golden variegations. Both these varieties are most outstanding, and very effective in any garden 2/- and 3/6

rubrum (Scarlet Canadian Maple), noted for its rich autumn tints. 5/-

tataricum ginnala, a graceful variety from Amurland, with slender twigs and prettily-cut leaves; the habit is dwarf and the leaves in Autumn attain a brilliant ruby-red colour; 10 feet ... 3/6

tegmentosum, this is probably the first time this rare Maple has been offered in Victoria; dull green leaves, the reverse side being a lighter shade, changing in the Autumn through yellow to crimson; one of the finest of Maples, suitable for large gardens ... 10/6

MAPLES OF JAPAN, the famous Japanese Maples. Throughout the year these are most beautiful, and none of the Autumn trees excels them; the leaves change from green to yellow or orange, others to red; some of the named varieties give their rich crimson colouring in Spring, as well as in Autumn .. 1/6, 2/6; large plants, 5/-

“Bronze Wing,” a seedling Japanese variety which originated at Mr. Bert Chandler’s nursery at Bayswater; the leaves are a delightful shade of soft golden green, with a heavy margin of bronze; an attractive and distinct variety ... 5/- and 7/6

japonicum aureum, leaves of beautiful golden yellow in Summer and Autumn 5/- and 7/6

japonicum filicifolium, large deeply cut and lacinated leaves turning to brilliant reds and yellows in Autumn 5/- and 7/6

palmatum atropurpureum, the young shoots are rich bronzy-crimson during the Spring and Summer, and turn a purplish crimson in the Autumn; the finest of the dark leaf type ... 3/6 and 5/-

- dissectum atropurpureum**, exquisite, finely-divided, fern-like leaves, which are rich crimson in the Summer and turn to deeper crimson in the Autumn; of graceful, pendulous habit . 3/6 and 5/-
- dissectum atropurpureum** standards, grafted three to four feet from the ground 12/6
- dissectum**, drooping graceful feathery leaves, green in colour. 5/- to 7/6
- Akajinishiki**, a new magnificent variety, leaves brilliant fiery scarlet red margined all the summer 5/- to 7/6
- atropurpureum**, deep maroon, large regular palmate . . 3/6 to 7/6
- aureum**, circular shape, obtusely cut yellow leaves 3/6 to 7/6
- daimyonishiki**, leaves large bright crimson with fiery scarlet variegation 5/- to 7/6
- linearilobeum atropurpureum**, leaves dark crimson from spring to autumn 5/- to 10/6
- Nishikigasane**, palmate, yellow variegated 3/6 to 7/6
- Okushimo**, small beautiful green leaves rolled in from both edges . . 3/6 to 7/6
- Osakazuki**, the finest form for autumn colour; large green leaves, changing in autumn to fiery orange, crimson and scarlet . . . 5/-
- reticulatum**, green network variegation on yellow ground . . 3/6 to 7/6
- rosa-marginalis**, green, small leaves, crimson margined . . . 3/6 to 5/-
- roseum**, small palmate leaves margined with deep pink . . . 3/6 to 7/6
- sanguineum chishio**, blood red, regular palmate, small leaves 3/6 to 7/6
- scolopendrifolium**, green, narrow leaflets 3/6 to 10/6
- Rubrum**, red, narrow leaflets 3/6 to 10/6
- seigen**, the wood of this variety turns a bright red in the winter, foliage very fine in the autumn and spring 3/6 to 7/6
- Sieboldianum**, leaves assuming yellow in autumn 5/- to 7/6
- ACTINIDIA chinensis**, Chinese gooseberry, a remarkably handsome climber of vigorous growth; the leaves are broad and bright green, while the young growths are closely covered with reddish hairs; to secure crops of the fruit, which is edible and agreeably flavoured, it is necessary to plant vines of both sexes 5/- per pair
- ADENANDRA multiflora** (pink Diosma), small shrub of upright habit, covered with tiny, vivid pink flowers and fine green foliage. It blooms about August, and remains in flower for months . . . 1/6
- AESCULUS Rubicunda** (The Red Horse Chestnut), the Horse Chestnuts are large-growing deciduous trees, grown for their handsome foliage and showy flowers in Spring; they make fine specimens in cool districts; the large seeds are not edible 2/6
- AKEBIA quinata**, a handsome evergreen climber, producing dark, chocolate-purple flowers in pendant racemes; spicy fragrance . . . 2/6
- AMELANCHIER canadensis** (June berry), small tree covered with bunches of white flowers in Spring, followed by purple berries and Autumn tinted foliage 1/6
- ANDROMEDA arboreum**, a first-class Autumn foliage tree; it thrives in a lime-free soil. The important merits of the tree are its panicles of white flowers in late Summer and richly-coloured orange and crimson leaves in Autumn 3/6
- Catesbaei** (leucothoe), long arching branches, from which hang numerous bunches of white wax-like bells, handsome foliage, Autumn tints 1/6, 3/6 and 5/-
- Rollisoni**, a small edition of the above, suitable for rockeries . . . 2/6
- Davisiae** (Leucothoe), a rare American variety with conspicuous racemes of white flowers; evergreen 3/6
- formosa** (Pieris), one of the choicest evergreens in the garden; pure white bell-shaped flowers in large clusters from 3/6
- japonica** (Japanese Pearl flower), a choice shrub, beautiful at all stages of its growth; quite hardy if grown in fairly firm lime-free soil. The sprays of pearl-white blossoms are long and droop gracefully, literally covering the dark shiny foliage . . 1/6, 2/6
- japonica variegata**, variegated form of above 2/6

- Mariana** (Pieris), clusters of small pitcher-shaped flowers, white, tinged with red; Autumn foliage 3/6
- paniculata** (Lyonia paniculata), a deciduous variety, with cream, sweetly-perfumed flowers in Spring. In Autumn the foliage assumes brilliant tints 1/6 and 2/6
- polifolia** (Bog Rosemary), small evergreen shrubs with pink bell-shaped flowers; it requires moist shady position 3/6
- speciosa** (Zenobia), a beautiful evergreen, very free flowering, flowers milky white, with brown anthers 2/6
- zenobia speciosa pulverulenta**, a more beautiful variety than Speciosa, blooming with greater freedom, the mixture of young blue-white leaves and pure white flowers being very attractive; the back of the flowers and stems are covered with a white, powder-like down 5/-
- ARONIA floribunda** (Chokeberry), deciduous shrub bearing bright purple berries; foliage turns red in the Autumn 1/6 and 3/6
- AZALEAS.** I have a large stock of these available, but am listing only a few of the best and more unusual types.
- Kurume**, this section is of dwarf habit and particularly suited for growing in a semi-shaded position, either in the garden or rockery. The flowers are so profuse that the foliage is literally hidden. I have a large collection of these 2/6 and 3/6
- Hinodigira**, a small shrub, covered with medium-sized flowers of brilliant fiery red 1/6 and 2/6
- Benigiri**, semi-double, red 1/6 and 2/6
- Mollis**, this is quite a distinct type of Azalea, carrying Rhododendron-like heads of flowers of gorgeous hues ranging from pale lemon through apricot to brilliant flame. They are also worth growing on account of their wonderful Autumn foliage, and as they are deciduous, may be grown in association with Rhododendrons, which are evergreen. They are quite hardy and will stand more exposure than Rhododendrons. Below is a list of a few varieties of merit. A fuller list on application.
- Azalea flame**, flame. **Azalea deep red**, red. **Azalea Raphael De Smet**, white, shaded rose, double. **Azalea Anthony Koster**, yellow. **Azalea Hugo Koster**, salmon. **Azalea Koster's brilliant**, red.
- Azalea F. C. Van Tol**, tango from 5/-
- Rosaeflora** (Balsamiaeflora), a gem among Azaleas. The dwarf bush is covered with charming little double rosy-salmon flowers, like tiny rose-buds. I cannot speak too highly of this beautiful variety 3/6 and 5/-
- Yedoense** (Yodagawa), a deciduous species from Korea, growing 2 to 3 ft. high, the plant is literally covered with pretty double mauve flowers; I consider this one of the finest Azaleas for general purposes 2/6 and 3/6
- BERBERIDOPSIS corallina** (Coral Plant), an evergreen climbing shrub of remarkable beauty, with drooping clusters of deep, coral-red flowers and dark green leathery leaves; it does best in sheltered position in lime-free soils 5/-
- BERBERIS.**
- Coryi**, very hardy, low-growing shrub, with most brilliant Autumn colouring from 2/6
- Darwini**, indispensable choice shrub; rather slow growing, but flowering when quite small; rich orange blooms like tiny daffodils in long sprays 2/-
- minuta**, resembling Wilsonae in appearance, but smaller, with larger and brighter berries 1/6
- Nana compacta**, a dwarf berberis very suitable for rockeries and growing only to about one foot; a gem 1/6
- Seedlings.** I have a large number of seedlings raised from dwarf and miniature types similar to Stenophylla. They would be very useful for rock gardens 1/6

- stenophylla**, beautiful in flower, evergreen; does not colour much. Long graceful shoots densely clothed with tiny evergreen leaves and smothered in Spring with lemon-yellow flowers; it does well under trees 2/6
- stenophylla Autumnalis**, pendulous branches of narrow, dark green foliage and large, drooping sprays of golden-yellow flowers in Spring and Autumn 2/6
- stenophylla semperflorens**, a dwarf and compact variety with pale green leaves, which are tipped with bronze in the young stage; every tip terminates in a small raceme of coral buds and yellow flowers, which are produced over a long period; good rock subject . . 2/6
- Thunbergi atropurpurea**, exceptionally fine foliage, rich bronzy-red tint, lasting from the Spring until the Autumn; highly recommended for colour effects 1/6
- vulgaris**, deciduous variety, flowers yellow, followed by orange-red berries, very fine for decorations 1/6
- vulgaris purpurea**, purple form of vulgaris 2/6
- Wilsonae**, a variety of spreading habit, with needle-like spines; flowers yellow, followed by berries of a cream colour which turn to scarlet in the Autumn 1/6
- BETULA populifolia purpurea**, the rare purple variety of the well-known Silver Birch 7/6
- pubescens, var. undulata** (The Cut-leaf Birch), I have some nice specimens of this rare and beautiful Silver Birch 10/6
- pyramidalis**, has white bark of Silver Birch, but grows strictly pyramidal 5/-
- BRACHYGLOTTIS purpurea**, a N.Z. native, with large purple leaves with white backs and small greenish white flowers, scented like Mignonette; suitable for windy positions 3/6
- BUDDLEIA Colvillei**, a variety of great beauty, having silvery-grey foliage, and large, bell-shaped, bright rose flowers, resembling a pentstemon; a strong grower 2/6 and 3/6
- Farrerri**, a new species from Kansu, in China, introduced by Farrer in 1918, who named it "The Grey Flannelled Buddleia." This is an appropriate name, for the reverse side of the leaves is covered with a thick woolly tomentum, giving the appearance of grey flannel. The rose-lilac flowers appear during the Winter months. This species is worth planting for the foliage alone; 12 ft. . . 5/-
- CALLICARPA Geraldiana**, a rare Chinese species. The interesting pink flowers are produced during Summer; they are followed by ornamental purple fruits 3/6
- americana**, neat shrub with small red flowers, followed by purple berries in Autumn 2/6
- purpurea**, small shrub, with long purple leaves and purple berries . 3/6
- CALYCANTHUS praecox** (Allspice Tree), highly scented, creamy yellow flowers, purple centre; splendid Winter-flowering shrub . . . 2/6
- CAMELLIA.**
- Alma**, dark red, fairly large flowers with Anemone-like centres . . 5/-
- Como**, this is a new seedling which resembles "The Czar," both in size and shape, but is slightly darker in colour. It blooms early, the flowers opening about June 10/6
- Fimbriata superba**, this is unique; a double variety with fringy edges; the whole flower resembles a beautiful Carnation 15/-
- Gardenia**, double white variety; flower resembles a Gardenia . . . 5/-
- Great Eastern**, this is a semi-double red, of strong and vigorous constitution 5/-
- Hybrid**, this is supposed to be a cross between Japonica and Reticulata; a very beautiful variety according to English authorities. It has not yet flowered with me 42/-
- Lady Clare**, has resemblance to "The Czar," but a little larger and of a softer colour; limited stock 42/-
- Pink Czar**, a beautiful shade of pale rose-pink; the flowers are slightly smaller, but in every other way it resembles "The Czar" . . 10/-

- The Czar**, without a doubt the finest of all Japanese Camellias; colour carmine-rose; flowers single, 5 inches across, with spreading, wavy petals; a point of great beauty is its large, golden centre, composed of numerous stamens 10/6
- White Czar** (*Grandiflora*), large, semi-double white flowers with golden yellow stamens in centre; more decorative than the red variety 10/6 and 17/6
- Reticulata**, beautiful Chinese species; the finest Camellia yet in commerce; flowers vivid rose-carmine, approaching lake, very large and nearly single; flowers on small plants; stock limited . . 42/-
- Rose of the Dawn**, a single rose-pink variety; variegated leaves . . 5/-
- Splendidissima**, similar to Waratah, but a pretty shade of pink . . 7/6
- Tokyo**, a most distinct flower, semi-double, rich pink with conspicuous band of large, golden stamens 10/6
- Waratah**, this variety resembles the well-known N.S.W. Waratah, having crimson-red flowers with a bunched centre 5/-
- Single Pink Seedling**, this is a single pink variety not unlike the Pink Czar; very free flowering 7/6
- CAMELLIA SASANQUA.**
- Apple Blossom**, flowers resemble a glorified apple blossom. Winter flowering, strong grower 2/6 and 3/6
- pink**, single pink flowers 2/6 and 3/6
- Snow on the Mountain**, semi-double white flowers with yellow anthers; the whole plant is smothered with flowers, hence name; Winter flowering 3/6
- CANTUA dependens**, evergreen; pendulous, trumpet-shaped flowers, bright red; very effective; 6 ft. 1/6
- CARPINUS Caroliniana** (American Hornbeam), a small-growing tree, having pretty, beech-like foliage which turns orange and scarlet in the Autumn 2/6 and 3/6
- japonica** (Japanese species of Hornbeam), an attractive low-growing tree with prominently corrugated foliage 2/- to 3/6
- CEANOTHUS Marie Simon**, similar type to *Glorie de Versailles*, except that the blooms are pink; a very fine variety and well worth planting; Autumn flowering 3/6
- Burkwoodii**, a beautiful hybrid that has received two high honours. It won the Cory Cup in 1930 for the best new shrub of the year, and has also received the Award of Merit, R.H.S., England. It will quickly attain a height of 5 to 6 feet. The abundant spikes of flowers are of a rich violet blue, appear in early Summer and continue throughout the Autumn 5/-
- CEDRELA chinensis**, a fast-growing tree; leaves a beautiful pink when young 2/6
- CEDRUS atlantica glauca** (The Blue Atlas Cedar), a handsome tree with horizontal branches and silvery foliage; a most desirable form; true variety, obtained from grafts 2/6 and 3/6
- CERATOSTIGMA Plumbaginoides** (*plumbago Largentae*), rich vivid blue flowers; red tinted foliage 1/-
- Wilmottiae**, clusters of deep sky-blue flowers, 3 ft., continuously blooming; hardy 1/6
- CERCIDIPHYLLUM japonicum**, very uncommon deciduous shrub, well worth growing for Autumn foliage; red stems, bright green heart-shaped leaves, veined red 5/-
- CISTUS sunset**, bears large cerise pink flowers in the Spring; very floriferous; 2 ft. 1/6
- Wintoniensis**, foliage grey; flowers large pearly white, with a feathered zone of crimson maroon, yellow blotches at base of petals, 2 ft, 2/6
- CLEMATIS** (climbing), large flowering Jackmanni hybrids, twelve varieties available, including white, mauve, purple, blue, etc. 3/6 and 5/- each
- indivisa**, a New Zealand variety with large white flowers two to four inches across with conspicuous anthers; a beautiful evergreen species 2/6

- balearica* (Fern-like Clematis), this is an elegant slender evergreen with finely divided foliage bronze coloured in Winter; pale yellow flowers with reddish spots 2/6
- CLETHRA** (The Lily of the Valley Tree).
- arborea*, a splendid evergreen shrub of compact growth, bearing racemes of pure white flowers, similar to Lily of the Valley 1/6 and 2/6
- barbinervis canescens*, rare Jap. variety, bearing panicles, often 12 in. long, of fragrant white flowers in great profusion. It will thrive in damp ground or flower freely in same soil as Rhododendron and Azaleas 2/6
- COROKIA**. These interesting and ornamental evergreen shrubs from New Zealand are of easy culture: yellow flowers followed by coloured berries.
- Cheesemanni*, silvery grey foliage, yellow flowers followed by red berries. This makes a stately and distinctive shrub 3/6
- Cotoneaster*, a slow-growing, much branched and attractive shrub rather weird-looking; small yellow flowers followed by red berries 2/6 and 3/6
- CORNUS** (The Dogwood). The Dogwoods are large-growing shrubs, grown for their attractive flowers and fruits, also for the Winter effect of their brightly coloured branches. They are quite hardy, and thrive in good, deep, moist soil.
- Bayleyi*, recent introduction, white berries tinged with pale blue; beautiful Autumn tints 2/6
- florida*, rare variety of remarkable beauty, unique white flowers, vivid Autumn tints 2/6
- florida var rubra*, rose form of above; rare from 3/6
- Kousa*, a rare Japanese shrub with conspicuous white flowers, shaded rose; rich coloured Autumn foliage 5/-
- Mas*, a valuable early flowering shrub, yellow flowers followed by bunches of bright red berries 2/-
- officinalis*, similar to *C. Mas*; the leaves turn a distinct red in Autumn 2/6
- Spaethi*, a fast-growing shrub with beautiful golden foliage 3/6
- CORYLUS** (The Purple-leaved Filbert).
- Avellana-atropurpurea*, a very attractive and ornamental deciduous shrub of 4 to 5 feet, with deep purple foliage in Spring, retaining its beauty till late Autumn. Requires a cool, deep soil for best results 2/6
- avellana contorto*, a peculiar form of Filbert. The branches are curiously twisted like a corkscrew. Suitable for Japanese and rustic gardens; rare 5/-
- COTONEASTER**, dwarf shrubs bearing masses of red berries during the Autumn and Winter months.
- adpressa*, a dwarf, rock-hugging species from China; red fruits and deciduous leaves, which turn red before falling 2/-
- congesta*, a very distinct rock species, which clings closely to every contour; brilliant vermilion berries 2/-
- horizontalis*, one of the most beautiful of all species; spreads low, with frond-like branches, studded with brilliant berries; may be trained up a wall 1/6 and 2/6
- horizontalis variegata*, most attractive variety with constant prettily variegated foliage, especially pleasing in Autumn when the small silver leaves are suffused with shades of red; red berries 2/6 and 3/6
- humifusa* (*Dammerii radicans*), a curious and attractive Chinese species, hugging the contours of rock or ground with slender branches, large glossy leaves and large coral-red berries 2/-
- microphylla*, picturesque evergreen rock or wall shrub, deep green box-like leaves; berries velvet crimson 1/6 and 2/-
- Nitens*, a dwarf bushy variety with red fruit and slender stems: carrying an abundance of lustrous leafage which in Autumn assumes most beautiful tints. It grows to about six feet 2/6

- No. 1173, rock var., varying bright berries; 12 in. 1/6
- Robertii**, dwarf var., with bright berries; 12 in. high 1/6
- Serotina**, a recent introduction; beautiful bronzy-green foliage, particularly fine during Winter, when the large clusters of deep sealing-wax red berries are shown to advantage; even as a flowering shrub it is really attractive; this plant should be in every garden 2/6 & 3/6
- Watereri**, a new hybrid of great merit: the most outstanding of the new *Cotoneasters*. The branches are laden with bright scarlet berries during late Autumn and Winter months; semi-evergreen 2/6
- CRATAEGUS**. Small and easily cultivated, highly ornamental trees deserving to be more widely planted. The autumnal colourings and berries of many are attractive features. The following are a few of the choicest varieties.
- Arnoldiana**, a very attractive species, with large, cherry-like fruit 2/6
- azarolus**, very attractive when in fruit, which is large orange-yellow with a red blush, useful for jelly 2/- to 2/6
- Canbyi**, wide spreading branches and long dark fruit 2/6
- chlorosarca**, pyramidal growth; fruit orange-yellow 3/6
- coccinea**, variety with white flowers; berries bright red; fine Autumn foliage 2/6
- cockspur**, berries red; beautiful Autumn foliage 2/-
- cordata** (Washington Thorn), flowers white; magnificent for Autumn foliage; one of the finest 2/-
- Douglassi**, flowers white 2/6
- durobrivensis**, very large flowers and bright red fruit 2/6
- Ellwangeriana**, large crimson fruit, broad-leaved variety . . 2/- to 2/6
- horizontalis**, this variety forms an umbrella-shaped head; plants available on standards 7 to 8 feet high 15/-
- Korolkowi**, one of the most striking of the flowering Hawthorns. Dark green foliage; the young wood is tinged with red; clusters of large fruits, which are a shining red marked with minute dots . . . 2/-
- mexicana**, fruit very large, yellow, like a crab apple; evergreen . . . 2/6 to 3/6
- oxyacantha coccinea flore pleno** (Hawthorn), flowers double crimson 2/- to 3/6
- oxyacantha punicea**, single scarlet; very pretty 3/6
- oxyacantha rosea flore pleno**, double bright pink 2/- to 3/6
- persimilis**, a distinct variety, with large foliage and brightly-coloured berries 2/6
- Smithiana**, semi-evergreen. In Autumn the foliage assumes rich colouring, berries bright shining red 2/6
- splendens**, this variety makes a very fine tree and has beautiful Autumn colouring; earlier than any other variety 2/6
- tanasetifolia Orientalis**, a very pretty variety, with much divided leaves and abundance of large red fruit 2/-
- CYDONIA** (Japanese Flowering Quince).
- japonica aurora**, large salmon red; 3 ft. 1/-
- japonica Columbia**, bright orange-red, very strong grower; 3 ft. . 1/-
- japonica pygmea**, a dwarf variety, with rich salmon flowers; very free fruiting; 2 ft. 1/-
- japonica salmonea**, clear salmon-rose, large flowers; 2 ft. 1/-
- japonica umbilicata**, rich red, fine variety; 4 ft. 1/-
- japonica vermillion**, very brilliant red; a superb variety 1/-
- Collection of the above six for 5/-.
- japonica double salmon**, one of the best of the flowering quinces . 2/6
- Maulei**, the most charming of all dwarf red-flowering shrubs; considered to be the best of the flowering quinces, the shrubs literally wreathing the branches with blossom; fruits freely 2/-
- CYTISUS** (Broom). The recent introduction of the set of splendid new varieties offered has brought this highly satisfactory family of lovely plants into the front border. They are the easiest plants to grow, will stand wind or exposed positions, accommodate themselves, and flower cheerfully in the poorest or driest of soils.

- Andreanus Smithii**, a great improvement on the type; flowers crimson and bronze; most attractive 2/6
- Cornish Cream**, creamy white, with yellow centre 2/-
- Enchantress**, this strikingly beautiful Broom has wing petals of rose-pink, striped with glowing carmine, which stands out to advantage against a standard petal of two shades of rose . . 2/6 and 3/6
- DABOECIA (Menziesia)**, the beautiful Irish Heath, growing 18 inches high, producing masses of hanging, bell-shaped flowers.
- polifolia alba**, pure white 1/6
- polifolia atropurpurea**, rich purple 1/6
- DAPHNE.**
- acutiloba**, a new and rare Japanese specie with fragrant white flowers followed by large scarlet, ultimately dark red berries; small plant 5/-
- odora (indica)**, a familiar favourite in our gardens, producing in Winter bunches of sweetly-scented pink and white flowers; 3 ft. . . 2/6 to 3/6
- odora alba**, white flowers, perfume slightly differing from odora.
- variegata**, variegated form of above 3/6
- DAPHNIPHYLLUM macropodum**, a striking evergreen shrub with large, rhododendron-like leaves; slow growing 5/-
- DESFONTAINEA spinosa**, an evergreen shrub with holly-like leaves; bears large scarlet, tubular flowers tipped with yellow; has cherry-like fruit. Few shrubs can compare with this when in full bloom 3/6
- DESMODIUM penduliflorum**, a hardy, semi-deciduous shrub of pendulous habit, producing spikes of small purple pea-shaped flowers. The foliage turns a golden-yellow in the Autumn 2/-
- DEUTZIA**, an easily cultivated genus of Asiatica Spring and Summer flowering shrubs. The flowers are borne in great abundance and vary from white to rosy-pink.
- crenata magnifica**, one of the gems; a beautiful shrub, laden with snowy-white flowers 1/6
- gracilis rosea**, flowers clear rose, buds deep carmine, free flowering 1/6
- longiflora Veitchii**, the finest of the pinks, being rich rosy pink throughout 2/6
- scabra fl. pl.**, double flowers of pretty rosy pink 2/6
- scabra watereri**, strong tall-growing variety with single rosy purple flowers 1/6
- DIPELTA florabunda**, the shrub collector who wants a rarity will not overlook the Dipelta; it belongs to a genus exclusively Chinese, and has been cultivated in Western gardens only a few years. It forms a deciduous shrub some ten to twelve feet in height, with an upright habit, although often developing straggling side branches which add greatly to the floral display by forming pendulous arches of blossom. The fragrant flowers, produced during early Summer, are blush pink with a yellow throat, about one to one and a half inches in length. On a fair-sized specimen there may be hundreds of blossoms on each side branch. Plant in a good loam; moist conditions are preferred 10/6
- DISANTHUS cercidifolia**, this rare and beautiful Autumn-foliaged shrub is one of the greatest treasures of English gardens; it grows 8 to 10 feet high, with slender spreading branches; its handsome, heart-shaped foliage turns in Autumn to the loveliest of claret reds, suffused with orange. It needs a soil that keeps moist, and light shade also would be appreciated 12/6
- DODONAEA viscosa purpurea**, a New Zealand shrub with purplish foliage, followed by purple winged seeds, attractive and distinctive, suitable for seaside planting 2/6
- ELM Louis van Houtte**, the finest of the Golden Elms from 2/6
- horizontalis**, this is an improvement on the Weeping Elm, the branches spreading at right angles, therefore not needing support; 10 feet standards 25/- to 50/-

- EMBOTHRIUM coccinium**, this marvellous tree, known as the "Chilean Fire Bush," should be grown by all. It produces, during Summer, a profusion of brilliant scarlet flowers, rivalling the finest Rhododendrons and the wonderful Waratah. I have a fine stock, one-year-old; rare 3/6 and 5/-
- ENKIANTHUS campanulatus**, beautiful in flower and leaf, cream flowers, bells tipped with red, resembling Andromeda; lime hater . . 5/-
japonica, similar to above, white flowers; superb Autumn tree . . 5/-
cernua rubens, with smaller red flowers 5/-
- ERICA (Hardy Heaths)**, the following is a selection of the best of these beautiful low-growing heaths. They are quite hardy, easy to grow, and do not die out with cultivation. All are ideal for rock gardens.
carnea (King George), very dwarf variety with deep pink flowers . 2/-
mediterranea hybrida, a fine, long-flowering hybrid of strong, bushy habit, bearing rose-pink flowers 2/-
Mrs. Doncaster, flowers rich rose; very pretty 2/-
tetralix (Silver Bells), a dwarf Erica with silvery-pink bells; grows about 1 foot high; very free flowering 2/-
vagans (Cornish Heath), a low-growing bush with bright carmine-red flowers 1/6
vagans St. Keverne, a beautiful variety, having bright rose flowers . 2/-
vulgaris Alportii (true), deep crimson flowers; strong grower . . . 2/-
vulgaris fl. pl. (calluna), double form of the well-known "Scotch Heather." Magnificent variety with long spikes of bright pink double flowers; rare 2/6
vulgaris Serlei, tall white variety, late flowering 1/6
- ESCALLONIA Donard Beauty**, by far the finest Escallonia. The graceful arching branches are smothered with rosy red flowers; while it is of vigorous growth it maintains a compact bush. Award of Merit, 1930 2/6
Fretheyii, the best pink variety, which flowers over a long period, making a nice, shapely bush; good for cut flowers 1/6
- EUCRYPHIA pinnatifolia**, one of the finest Autumn-flowering shrubs, bearing in February a profusion of satiny white flowers 2½ inches across; in addition, it winds up the season with a leaf colour of unrivalled splendour. No shrub is more worthy of the attention of anyone who can give it a cool, lime-free soil. A moist position is essential for successful cultivation 3/6 to 10/-
- EUGENIA ugni** (Myrtus ugni), a miniature evergreen shrub; white, fuchsia-like flowers, followed by small red, flavoured fruits in Winter 1/6
- EUONYMUS alatus**, slow-growing much-branched shrub, about 6 feet high, native of Japan and China. This is one of the finest of all deciduous shrubs for Autumn colourings, the leaves turning a clear vivid crimson; the corky winged bark is very distinct 3/6
alatus colorata, similar to above, but bronze-coloured leaves of stiff habit, a beautiful Autumn shrub 3/6
alatus varr. subtriflorus, a shrub noted for its rich rosy-scarlet leaves in Autumn. This distinct variety has no corky wings to the branches as has the type *alatus*; 7 ft. 3/6
chrysophyllus, of erect growth, with golden yellow foliage, which does not burn in the sun 3/6
europaeus (Spindle Tree), covered with rosy scarlet fruit, which split and reveal orange seeds; Autumn tinted foliage 2/6
europaeus atropurpurea, the purple form of the well-known Spindle Tree; foliage dark purple during Summer, changing to sanguineous purple; rose pink fruits; a charming novelty . 3/6 to 5/-
europaeus, special type, selected from amongst a large number of seedlings, a type which is a marvel for the quantity of berries produced. As these are grown from grafts or cuttings, customers can be assured that these quantities will continue 3/6

- latifolius**, the wide-leaf green Euonymus; the fruit is far larger and more striking than the ordinary Spindle Tree; one of the most beautiful shrubs in the Autumn 3/6
- nanus**, a charming dwarf, semi-evergreen procumbent shrub; leaves bronzy in Autumn and early Winter; good rock plant . . . 1/6
- radicans colorata**, a new variety from America. The leaves are beautifully coloured a deep sanguineous purple throughout the Winter; evergreen 1/6
- Wilsoni**, a striking new Chinese species said to produce remarkable hedgehog-like fruit; evergreen 2/6
- yedoensis**, a beautiful fruiting Autumn colouring variety 2/6
- EXOCHORDA grandiflora** (syn. *Spirea grandiflora*), hardy deciduous shrub, producing snow-white flowers in the early Spring; a beautiful shrub for any garden; 5 to 6 feet 2/-
- FAGUS** (Beech Tree), hardy trees, suitable for cool districts. The foliage is attractive, particularly in the Spring.
- sylvatica purpurea**, the Copper Beech, a very handsome variety with deep purple foliage in Spring and Summer 3/6 to 5/-
- sylvatica purpurea pendula**, a rare weeping form of purple Beech 15/-
- sylvatica purpurea Riversii**, the large-leaved Copper Beech, a selected variety with large broad foliage of a very rich purple colouring; grafted plants 7/6
- tricolor**, its copper leaves are tipped with rose and white; exceptionally beautiful 7/6
- FEIJOA Sellowiana**, an evergreen shrub, having an unusual bloom of red and white in Spring, followed by an edible fruit, green in colour and highly scented 3/6 to 5/-
- FENDLERIA rupicola**, this newcomer is from the sunburnt slopes of the mountainous regions of Texas and Arizona. It grows to 6 ft. high, is deciduous, and quite hardy; the flowers are white, slightly tinted pink, about one inch across. A really elegant shrub of great beauty 3/6
- FORSYTHIA**. The Forsythias are beautiful early Spring flowering shrubs of easy cultivation.
- europaea** (albanian Forsythia), a free flowering variety with yellow flowers and conspicuous Autumn foliage 2/-
- intermedia Vittelina**, a dwarf-growing deciduous shrub, a new variety. I consider this one of the best Forsythias, being upright in habit, about 4 ft., and the branches thickly covered with yellow flowers before the leaves appear 2/6
- intermedia, var. spectabilis**, this variety has the largest flowers, and is the most beautiful and showy of them all. It has a stiffer habit than other Forsythias, and is effective either as a single specimen, when its uneven growths give the plant a picturesque appearance, or in groups, when the wonderful profusion of flowers provides a beautiful display which lasts for several weeks 2/6
- suspensa atrocaulis**, the most distinct of all; the stems are dark purple or almost black, and form a contrast to the golden-yellow flowers; new 3/6
- FRANCISCA speciosa major**, evergreen. Flowers are sweetly Gardenia-scented, and are large, single, and sky blue, later changing to white. Flowers continuously during Summer; 8 to 10 feet 2/6
- FRAXINUS Raywoodi** (Claret Ash), one of the finest novelties of recent years. Early in the Autumn it assumes a striking colour, which may be described as bright claret or claret-crimson when the sun strikes through the leaves. It retains its wonderful foliage for a long period 3/6
- FUCHSIA Macrostemma var. alba**, a large-growing Fuchsia with masses of faintly pink miniature flowers, each flower a counterpart of a ballet girl 1/6
- GARRYA elliptica**, an evergreen bushy shrub, producing, in Winter, gracefully drooping tufts of pale green catkins from 1/6

GINKGO biloba (The Maidenhair Tree), one of the most distinct and beautiful of all deciduous trees. The leaves are shaped like the Maidenhair Fern, and turn to a delightful golden yellow in Autumn. The Ginkgo is especially worthy of note in that it is the one tree which is known to have come down to us from the Middle Ages. Fossilised forms of it are to be found all over the world 3/6 to 5/-

GORDONIA anomala, handsome evergreen shrub, glossy foliage, single cream camellia-like flowers in Winter; a good evergreen 3/6 and 5/-

GRISELINIA littoralis, a splendid hardy evergreen tree of olive-like appearance, with its pale green roundish leaves 2/-
littoralis variegata, an extremely hardy variegated shrub; good foliage; excellent for hedge plants 2/-

HAMAMELIS mollis (The Chinese Witch Hazel), is a rare and beautiful hardy shrub producing fragrant, rich, golden, spider-like flowers in profusion in the middle of Winter, followed by glorious Autumn tints 5/-

HEDERA.

conglomerata, a quaint, wee non-climbing Ivy, suitable for rock-gardens 1/-

HOHERIA populnea, one of our most beautiful Lacebarks, with white flowers and fine foliage; quick growing 2/-
populnea variegata, novelty, beautiful variegated foliage; a great acquisition; plant in sun 3/6

HYDRANGEA, New. To those who know only the old blue and pink varieties, the new shades must come as a delightful surprise. The huge heads of some, the large individual pips and serrated edges of others, all add to their charm. The colours given in descriptions are of those produced in ordinary garden soil. Good rich soil and plenty of moisture are desirable. Wet and shady positions generally tend to turn plants blue, while open sunny aspects to pink. Lime and alkaline manures keep flowers of pink-blooming plants pink; alum or sulphate of iron will preserve the blue shades.

Bards, a strong variety, large pips, deep red; one of the best.

Blue Prince, rosy red; when blued is a lovely cornflower blue.

Baroness Schroder, distinct shade of flesh pink suffused with salmon; early.

Deutschland, vigorous variety, enormous heads of red flowers; extra.

Domotoi, large heads of double pink flowers.

Dr. Endtz, excellent variety with large red flowers; splendid.

Elmar, carmine-red, dwarf and bushy; one of the best.

John Mensing, rich bright red; free flowering.

King George, bright rosy pink, serrated edges; very strong grower.

Lancelot, lovely pink, edge of each petal fringed.

La Marne, strong grower, enormous heads of deep pink flowers.

Parcival, deep rich red, fimbriated petals; free flowering.

Peer Gynt, salmon pink, very large truss and pip.

Rouget de Lisle, bright carmine red; very dwarf.

1/-. Collection of 6 for 5/-.

arborescens grandiflora, a variety from America, has clusters of large creamy-white flowers abundantly produced and remaining in good condition for a long time 1/6

paniculata grandiflora, a most beautiful but little known Japanese variety, producing huge pyramidal trusses of creamy-white flowers, fading to pale pink; quite distinct and very hardy . . 2/6 and 3/6

quercifolia (The Oak-leaf Hydrangea), pyramid heads of white flowers which fade to deep pink. The peculiar lobed leaves acquire magnificent Autumn tints 3/6

scandens, an attractive self clinging climber from Japan. The flowers appear in Summer and are densely packed flat heads six to ten inches across with a few sterile flowers along the margins . . 3/6

- strigosa**, a new species, native of China. It has large long leaves and blooms during Summer. The flower head seven to eight inches across colours from white to purplish blue. There are bristles on the leaves and stems 1/6
- Thunbergii**, a low grower with white blooms embroidered blue and pink 1/6
- HYPERICUM patulum grandiflorum**, of recent introduction; a hardy evergreen shrub with large yellow flowers, 3 in. across, Summer and Autumn 1/6 to 2/6
- IDESIA polycarpa** (The Wonder Tree), a remarkably handsome and useful tree. The inconspicuous flowers are followed by long racemes of bright red berries in profusion, which persist until the following crop appears and retain their colour even when picked, and last for many weeks in water in perfect condition. They are unpalatable to birds. The large lustrous foliage turns vivid colours in Autumn, and is most valuable for decorative purposes. Reputed to grow in any position 2/6 to 5/-
- INDIGOFERA decora**, a small deciduous shrub, with beautiful pendulous sprays of flowers, resembling a small Wistaria, pink; height about 2 ft. 2/6
- Potaninii**, graceful, hardy, Chinese species; the most shrubby of all the Indigoferas, attaining about 5 feet. The long, arching branches bear up to 10-inch panicles of clear pink flowers . . 3/6
- ILEX crenata**, a rare small-leaved Japanese Holly with black berries. It grows about five feet and is very compact and ornamental . . 2/3
- ITEA Virginica**, North American shrub, 3-5 feet high, producing spikes of fragrant creamy-white flowers in July; wonderful Autumn tints 3/6
- KALMIA angustifolia**, a dwarf shrub producing in Summer clusters of pink flowers; requires a damp situation; 3 ft. 3/6
- KOELREUTERIA paniculata**, a hardy tree with beautiful foliage, colouring well before falling in the Autumn; bears yellow flowers 2/- to 2/3
- KOLKWITZIA amabile** (Beauty Bush), a shrub of recent introduction from China. The beautiful small Weigela-like flowers are shell pink with yellow throat, borne freely on great arching sprays. When fully established this is a magnificent shrub. Specimen plant, 5/- 1/6, 2/6
- LABURNUM vossi**, immense trusses of rich golden-yellow flowers; the best of the Laburnums 2/6
- vulgaris foliis aurea** ("The Golden-leaf Laburnum"), has bright yellow foliage throughout the Summer, with flowers similar to the ordinary variety 2/-
- Watereri**, a new Summer-flowering hybrid with extra long slender racemes of glowing golden-yellow flowers, bold glossy foliage 2/6
- LAPAGERIA rosea**, a glorious evergreen climber with large waxen lily-like flowers, colour rosy-crimson; requires partial shade, cool root conditions and lime-free soil 3/6 and 5/-
- LILACS** (*Syringa*), the Lilacs are hardy deciduous plants, and are noted for their attractive flowers of various colours produced in the Spring. They like deep rich soils, and are specially suitable for mountainous districts 2/- to 3/6
- List of varieties on application.
- LIQUIDAMBAR**, a Maple-like deciduous tree, having handsome, palmate foliage, which turns in Autumn to a brilliant red . . . from 1/6
- LIRIODENDRON tulipiferum** (Tulip Tree), large, conspicuous leaves of a soft green, turning in Autumn to a brilliant gold . . . from 2/6
- LONICERA Brownii, fuchsiodes**, beautiful variety with scarlet trumpet flowers hanging in bunches 2/6
- Hildebrandti**, evergreen climbing honeysuckle, immense yellow flowers, 7 in. long, shaded reddish orange; fragrant 5/-
- tatarica grandiflora rosea**, flowers bright pink, bordered with white 2/-

- LOROPETALUM chinensis** (Fringe Tree), an evergreen shrub, having white flowers not unlike those of the Witch Hazel in appearance; the petals are narrow and strap-shaped; it is a very pretty sight when covered with blossoms, about July; rare 2/6 and 5/-
- LUCULIA gratissima**, evergreen shrub, bearing in Winter rose-pink, sweet-scented flowers. A gorgeous shrub that requires a cool situation 3/6
- MAGNOLIA**, a group of useful hardy flowering shrubs and trees. The deciduous varieties bloom early in Spring before the foliage develops. The flowers are large, tulip-shaped, and in most cases sweetly scented. They all grow well in ordinary good loamy soil.
- acuminata** (Cucumber Tree), large upright-growing tree with greenish-yellow cup-shaped flowers; Spring blooming, fragrant; the fruit resembles small cucumbers, hence name 7/6
- alba superba**, a beautiful variety with large pure white flowers very freely produced; an outstanding variety 7/6
- Alexandriana**, an exceedingly rare hybrid, probably the first time offered in Australia. Large flowers, rose-purple, darker purple lines; interior of petals pure white. It is considered much superior to *Soulangeana* 5/-
- amabilis**, very early flowering variety, with perfumed, white, purple-tinted blooms 3/6
- dentata**, syn. *Conspica* (The Yulan Magnolia), large pure white flowers, about 6 to 7 inches across. One of the first Magnolias to flower; sweetly scented; a chaste and refined flower 10/6
- fusca** (The Port Wine Magnolia), a small, compact, evergreen shrub, small coppery-coloured flowers, with strong wine perfume 2/6 & 5/-
- grandiflora**, the well-known evergreen Magnolia, with large leathery leaves and large white flowers. (Note.—Plants offered are from layers, which flower early, and not seedlings, which take years to bloom) 3/6
- grandiflora**, var. *longiflora*, this has large, scented flowers, very much like *grandiflora*, but leaves are smooth and smaller; quite young plants produce flowers 5/-
- hypoleuca**, handsome Japanese tree-like species, resembling *M. Tripetala*; leaves very large, immense creamy-white flowers up to 8 inches across; stamens rise from a deep crimson base, back of sepals flushing claret with age 10/6
- Kobus**, white flowers 4 in. across. When fully developed the tree is covered with flowers. It resembles *Salicifolia*, but not as good 2/6 and 3/6
- Lennei**, one of the best and most satisfactory Magnolias. Flowers rich rose-purple outside, white inside, shape globular. This variety often has two flowering periods 5/-
- macrophylla**, an outstanding species, leaves 15 to 30 in. long and 10 to 15 in. wide. The flowers, when wide open, 10 to 12 in. across, creamy-white with purple blotch at base of petal; slightly fragrant 7/6
- Norbertiana**, like *Alexandriana*, but darker; dwarf-growing, free flowering 5/-
- obovata discolor** (*purpurea*), a bushy variety; flowers purple outside, white within 3/6
- parviflora**, this is a very showy and valuable garden ornament; and never fails to attract attention. Its white, cup-shaped flowers, which are 3 in. across, are vividly contrasted by a central mass of rich red stamens. As a lawn specimen it is admirable, for then the flowers can be seen from every point 5/-
- rustica**, seedling from *Lennei*, is a beautiful and easily grown variety. Flowers are cup-shaped, rosy purple 5/-

- salicifolia**, this is midway between *Kobus* and *stellata*, and is a slender upright-growing and beautiful *Magnolia*. The bark and young shoots, when crushed, give off a charming scent like lemon-scented *Verbena*; a gem 7/6
- soulangeana**, the well-known variety, with large, pinkish-white flowers stained purple outside; free-flowering, reliable, good variety . . 5/-
- soulangeana alba**, floriferous variety, white flowers tinged purple at the base, scented; rare 12/6
- speciosa**, large white flowers with purple shading; compact-growing shrub 5/-
- stellata**, small, fragrant, white, starry flowers; good dwarf habit, free-flowering, one of the best 7/6
- Watsoni**, the flowers are ivory white, pineapple scented, with concave petals, sometimes tinted pink outside; stamens rich crimson, forming a large rosette 2 in. across the cone-like centre; a beautiful *Magnolia* 7/6
- MAHONEY (Berberis) Bealii**, finest of all this race, winter flowering; large racemes of Lily of the Valley scented yellow flowers, followed by blue berries; noble foliage 2/- and 3/6
- aquifolia**, ideal shrub for planting under trees; holly-like foliage, masses of yellow flowers 1/6
- Fortunei**, autumn flowering species with distinct pinnate leaves and yellow flowers 1/6
- OLEA fragrans**, a handsome Japanese shrub; white flowers, minute, but deliciously fragrant; excellent evergreen shrub 2/6
- PAEONIA moutan** (The Tree Paeony), deciduous plant of 2 to 4 feet, with attractive foliage, and producing in the early Spring enormous flowers of gorgeous colours, white, pinks, red, etc. . . 5/- and 7/6
- Extra large single flowers, colour deep wine with conspicuous centre of yellow stamens 3/6 and 5/-
- Large specimen plants 7/6
- PANAX crassifolium**, N.Z. Lancewood, unique long sword-like leaves, a most unusual and interesting plant 2/6 and 3/6
- PARROTIA persica**, a superb deciduous shrub, with flowers conspicuous for numerous spreading stamens; leaves deep green in Summer, turning a golden crimson, orange and yellow in the Autumn . . 7/6
- PAULOWNIA imperialis**, a quick growing tree, with large leaves and sweetly scented blue flowers 2/6
- PENTAPTERYGIIUM serpens**, this beautiful shrub bears tubular scarlet flowers, which hang from the under side of the arching branches; the young shoots, which are tinged with red, make an added attraction. Requires partial shade and a lime-free soil 2/3
- PERNETTYA David's Hybrids**, the showiest of all dwarf evergreen shrubs; small white flowers in late Spring, followed in Autumn by conspicuous large marble-like berries from pink, crimson, to deep plum; semi-shade 2/6 and 3/6
- mucronata**, an ornamental fruiting shrub, covered in Spring with numerous white flowers and bright berries in Winter, which form a striking contrast to the dark green foliage 2/6
- mucronata alba**, variety with white berries 1/6
- mucronata rosea**, variety with rose berries 2/6
- PHELLODENDRON Lavallei**, a deciduous tree with corky bark, bearing large crops of black fruits and beautiful golden yellow leaves in Autumn 3/6
- PHILADELPHUS** (Mock Orange), deciduous bushy shrubs, covered in Spring with fragrant white flowers. They are perfectly hardy, and will thrive in almost any soil or situation. I can supply strong plants of all varieties from 2 to 4 feet.

- fantaisie**, long branches, covered their whole length with large flat flowers, fimbriated, pure white, with a slightly rosy tint in the centre; hardy, free, and fragrant 2/-
- lemoimii**, var. **Vole Lactee**, large single white flowers, 2 in. across, the best of the singles 1/6
- Mont Blanc**, grows 5 ft. high, erect branches, entirely covered with its fragrant flowers; I think the sweetest scented of all. A bush in full flower will fill the air for yards around with its delicious pineapple fragrance 2/-
- Rosace**, thin arching branches with large double flowers, creamy white, turning to pure white; deliciously scented 2/-
- virginal**, flowers largest of all Mock Oranges, pure white, double, produced freely, deliciously fragrant, very hardy 1/6 and 2/6
- PHOTINIA glabra rubens**, a hardy shrub, producing bunches of creamy-white flowers in Spring, but grown particularly for the young red brilliant foliage which covers the plant at each new growth. By frequently trimming this plant the process of bright young foliage is continually repeated 2/- and 5/-
- PHYGEDIUS capensis coccinea**, a new variety with rich scarlet tubular flowers on leafy stems, forming a large bush; ornamental, and lasting in flower for a long period 1/6
- POPLAR Yunnanensis**, a fast-growing species quickly developing into a delightful tree; the leaves are flushed red with crimson mid-rib 3/6
- POTENTILLA fruticosa Frederichseni**, dwarf shrub, thriving in sun or shade; lemon-yellow flowers; very fine form, like single roses 2/6
- POPULUS tremuloides** (The American Aspen), small heart-shaped leaves which turn brilliant colours in the Autumn; the leaves quiver in the slightest breeze 1/6 and 2/6
- PROTEA (The Cape Honeysuckle).**
- Cynaroides** (Giant Protea), large flowers, measuring 8 to 9 inches across, white and pale green inside, outside and tips of petals shaded pink 10/6
- Millefera**, blush pink 1/6
- Susanne**, a fine variety, producing red flowers in great profusion 3/6
- PRUNUS Zabelliana** (Cherry Laurel), a spreading floriferous prostrate variety forming an effective undergrowth. It is especially attractive when in bloom, at which time it is as handsome as the Andromeda; white 2/6
- PRUNUS amygdalus Pollardii**, an early and very pretty pink-flowered Almond 2/-
- Bleireiana flore pleno**, double bright rose flowers with purple foliage; leaves colour vividly in Autumn 2/-
- Mume**, a Japanese variety; flowers very early; brilliant pink 2/-
- Pissardi Nigra**, very dark purple, almost black, foliage; flowers pale blush; very attractive 2/-
- Vesuvius**, specially fine foliage; very large leaves of metallic crimson colour; very ornamental 2/-
- Weeping Flowering Cherry.** Few standards, from 3 to 4 feet high, available. Single white flowers, flushed pink; ideal for planting near fish-ponds, etc. 7/6 and 12/6
- PRUNUS SERRULATA (Jap. Flowering Cherries).**
- Hisakura**, semi-double, dark pink variety; rare 2/6
- Mount Fuji**, semi-double, pure white, large, sweetly-perfumed flowers; very handsome 2/6
- Shirofugen**, producing its double pink flowers at the same time as leaves appear 2/6
- PUNICA nana** (Pomegranate), a dwarf variety suitable for the rock garden 2/6

- PYRACANTHA coccinea Lalandii**, masses of white Hawthorn-like flowers followed by numerous brilliant orange-red berries. One of the best of this family 1/6
- PYRUS discolor** (Sorbus Mountain Ash), a fine new form of Mountain Ash, remarkable for its rich Autumn colouring; dwarf growing . . 3/6
- PYRUS MALUS (Flowering Apple).**
- Aldenhamensis**, rich bronzy foliage; flowers semi-double, wine-crimson, followed by large, purplish fruits 2/6
- angustifolia**, fl. pl., one of the prettiest; flowers very large, double, pale rose-pink; blooms late in Spring 2/6
- Eleyii**, a beautiful tree for foliage and flower, the foliage being of a bright reddish purple and the flowers rich vinous red, borne in clusters, followed by coloured fruit, which makes the tree very ornamental. Specimen, 5/- 2/-
- floribunda purpurea**, the flowers are large, single crimson, or bright cherry red, buds blood red 1/6 and 2/6
- gorgeous**, a popular new crab apple, being laden in the Autumn with brilliant orange-scarlet fruits 2/6 and 5/-
- pumila**, a dwarf variety, smothered with white flowers in Spring and wonderful tints in Autumn 1/6
- PYRUS arbutifolia**, var. **brilliant** (Red Chokeberry), a dwarf variety carrying masses of white flowers in Spring, followed by red fruits. The foliage assumes brilliant crimson colouring in Autumn. This variety grows to about six feet 1/6
- QUERCUS (Oak).**
- coccinea** (Scarlet Oak) 2/6
- palustris** (The Pin Oak), foliage deep green, turning bright red in Autumn 2/6
- rubra** (American Red Oak) 2/6
- RAPHIOLEPIS delacairei**, a charming shrub and one of the best of the new evergreens. The sweetly scented flowers are a good pink with dark centres and clusters in graceful heads 3/6
- RETINOSPORA obtusa Crippsi**, a lovely golden Conifer; finer than *Lawsoniana aurea*. The colour is very striking and the habit perfect; wonderful for grouping with Autumn colour; dwarf 3/6
- RHODOTYPOS kerrioides**, a deciduous shrub, having pretty silky foliage which turns bright yellow in Autumn; large white Anemone-like flowers 2/6
- RHUS cotinus folius purpurea**, purple leaf smoke bush with smoky, cottony blooms; a splendid shrub 3/6
- RIBES aureum**, yellow-flowered Currant; a beautiful Spring-flowering shrub 2/6
- ROBINIA Kelseyii**, a beautiful shrub of about 6 feet, has attractive foliage, purple in Spring, dark green in Summer, and assumes rich golden tints in Autumn. The flowers are violet-rose in colour, and hang in Wisteria-like racemes; needs protection from the wind 1/6
- RUSCUS (Butcher's Broom)**, evergreen shrubs with red berries, suitable for planting in a shady position; interesting and curious.
- aculeatus**, the native Butcher's Broom of England; berries red . . 1/6
- hypoglossum**, European variety with bright red berries. It grows about eighteen inches, and is excellent for planting in dense shade under trees 2/6
- ROSA Moyesii**, a dark red single rose, 3 in. across, centre surrounded by a thick ring of gold stamens. The blooms appear to be suffused with gold dust. After flowering it bears large, long, bright red berries throughout the Winter 2/6

MOSS ROSES. This class of Rose is very attractive by reason of the stems being very heavily covered with thousands of small, soft, moss-like thorns.

Baron de Wassenauer , carmine crimson	1/6
Captain Basroger , crimson; very double	1/6
Crested Moss , deep pink, heavily mossed; crested sepals; unique ..	1/6
Deuil de Paul Fontaine , bright pink; large and very full	1/6
Eugene Guinoisseau , reddish-cerise, changing to reddish violet; large and full	1/6
Gloire des Mousseuses , light crimson, very large and full; highly recommended	1/6
White Bath , pure white	1/6
Zenobia , pink	1/6

SAMBUCUS (Elder).

canadensis maxima , a magnificent form of American Elder, with large heads of pure white flowers sometimes two feet across, followed by reddish purple berries. The flower heads resemble fine lace. This grows about eight feet high	2/6
canadensis aurea , similar to above with large golden leaves	2/6
nigra aureo-marginata (Elderberry), leaves margined with bright golden yellow	2/6
nigra flore plena , double flowering form of the Elderberry	2/6
nigra fructu luteo , yellow fruiting form of the common Elderberry.	2/6
nigra laciniata , a handsome variety with leaves divided into deeply cut segments	2/6
nigra pyramidalis , a distinct upright form with a habit of Lombardy Poplar, soon making a thick corrugated trunk and forming a quaint old looking tree	2/6
racemosa , paniculate heads of flowers followed in November and December by erect pyramid clusters of bright scarlet berries ..	2/6
racemosa serratifolia , similar to above with cut leaves	2/6

SKIMMIA, a very attractive group of bushy shrubs which thrive in a shady position. Birds will not eat the conspicuous red berries.

formannii , this handsome variety has large glossy green leaves and red berries	2/6
japonica , the bright scarlet berries of this shrub give a brilliant show throughout Winter and early Spring	1/6

SPIRAEA Aitchsoni (sorbaria), fern-like foliage, immense blooms of creamy white flowers, superior to Lindleyana

japonica, variety rosea, a dwarf, hardy variety, having bronze foliage and heads of rose-pink flowers

Margaritae, a very useful species of rather medium size; it has rosy crimson flowers and the leaves take on a brilliant crimson colour in the Autumn

opulifolia aurea, an attractive variety, with rich golden foliage and pure white flowers in Spring; 4 feet

prunifolia, early flowering, very floriferous, sprays of white; glorious Autumn foliage

Thunbergii, a handsome dwarf variety with grass-like foliage, which assumes brilliant colours in Autumn; pure white flowers in early Spring; 3 feet

tomentosa, a neat growing plant, 1½ to 2 feet high, whose leaves and stems are covered with a brown down, terminal spikes of clear rose; leaves take on a charming tint of russet and red in Autumn

tomentosa alba, a pure white-flowered counterpart of the former, and a very desirable plant

Stephanandra Tanakae, from Japan. Retains its leaves until late in the year; a highly ornamental shrub; Autumn colourings ..

STEWARTIA (False Camellia).

pentagyna, the flowers are four to five inches across, creamy white, with yellow anthers 5/-

pseudo-Camellia, truly one of the aristocrats of the garden, and a much-prized tree in England. It has bronzy-green leaves and smooth reddish bark. The single three-inch white flowers are beautifully frilled and the centre is filled with orange-coloured stamens; unparalleled Autumn foliage 7/6

monadelpha, another gem of similar appearance, except that the wide open flowers are enhanced with violet stamens instead of orange 7/6

sinensis, similar to the above, but of more bushy habit and Autumn foliage, a more burning orange flame shade; frilled Camellia-like flowers in Summer 5/6 and 7/6

STRANVAESIA *Davidiana*, var. *undulata*, choice evergreen shrub from China, numerous white flowers, followed by orange berries; the foliage also turns brilliant colours in the Autumn and Winter, a fine and rare shrub 2/6 and 5/-

STYRAX *americana*, this American species attains about 8 feet and bears resemblance to *S. Japonica*. Flowers white, nodding, about one inch across, produced in the Summer 3/6

japonica, a small tree of singular grace and beauty; pendulous flowers of purest white in Summer; extra 3/6 and 5/-

obassia, an attractive variety from Japan, which has enormous, almost round, leaves and fragrant white flowers 5/-

SYMPHORICARPUS *vulgaris variegatum*, a pretty variegated shrub, quite hardy, the foliage being ideal for decorative purposes 1/6

SYRINGA *persica* (the Persian Lilac), an old favourite which has been almost unobtainable of later years; nice plants 1/6

Wolfii, a recently-introduced variety, with long, loose racemes of pale, violet purple flowers; recommended 3/6

THROPTOMENE *Mitchelli*, an exquisite dwarf Australian shrub; sprays of small snow-white flowers in terminal and lateral bunches. A delightfully precious thing, lasting three months in flower . . 2/-

VACCINUM *corymbosum*, one of the most popular of the *Vacciniums*, growing 5 to 8 ft. in height, with erect stems and slender branching heads. Many clusters of pale pink flowers, which change to white as they age, are borne in late Spring. The small berries are black with a blue bloom, but it is the foliage in Autumn and early Winter turning a vivid scarlet which is the greatest attraction; loamy soil; hardy 3/6

VIBURNUM *Burkwoodii*, the original of this modern shrub was *V. Utile* x *V. Carlesii*. It may be most simply described as an evergreen form of *V. Carlesii*, attaining a height of 8 feet when fully developed. The large leaves are glossy with a light reverse; the fragrant pale pink flowers, which are borne in terminal clusters, are far larger than *Carlesii* and they open earlier 3/6 and 5/-

bitchuiense, a rare Japanese species, with fragrant flowers resembling *Carlesii*, but later. Autumn foliage, rare 5/-

brevipes, a strong upright-growing variety bearing white flowers, followed by red berries; Autumn foliage 2/-

cassinoides, an erect shrub of round form, 4 to 6 ft. high, which bears wide cymes of blue-black fruits. The unfolding leaves are bright copper coloured, ageing to dark green, changing during Autumn to dark crimson, and finally to bright scarlet 3/6

Carlesii, the finest of the genus, with beautiful pink *bouvardia*-like flowers, with *daphne* fragrance. Flowers last in bloom for weeks 3/6 and 5/-

dilatatum, a new variety, having beautiful loose sprays of cherry-red berries, which remain on the bush for a long time; handsome, deep green wrinkled foliage; stocks limited 5/-

fragens, a hardy shrub, flowers white and wax-like, very fragrant 3/6

- hupehense* (New Chinese), few shrubs can compare with this when in fruit. The berries are glistening wine red 1/6
- japonicum*, handsome evergreen shrub with shiny foliage, fragrant white flowers, followed by bright red berries in Winter . . . 2/-
- lantana versicolor*, the foliage is pale yellow in the Spring and Summer, changing to various colours in the Autumn 3/6
- lentago*, a striking shrub with creamy white flowers, distinct foliage, and large blooms, blue black berries 2/6
- odoratissimum*, a good evergreen shrub with unique dark glossy leaves up to eight inches long; fragrant white flowers 2/6
- opulus*, the common or single flowered form, which, in Autumn, produces glorious effects with its rich foliage and heads of bright currant-like berries; six to eight feet 1/6
- opulus sterile*, the Snowball Tree or Guelder Rose. This is a well-known deciduous variety, producing a wealth of white ball-like flowers in Spring; the foliage turns reddish-bronze in Autumn; six to eight feet 1/6 and 3/6
- opulus robustum*, this is a larger-flowering type of the common Guelder Rose 2/6
- Sargentii*, of dense habit; white flowers in large clusters and red berries. The large leaves turn to bright Autumn tints 3/6
- Seiboldii*, the correct species, which is deciduous, and is quite distinct from the evergreen species, with crimson berries, which has been sold under this name. *V. Seiboldii* is a deciduous Japanese shrub, the unfolding leaves of which in Spring are tinted a beautiful pale coral, changing to green; in Autumn they are coppery bronze; the berries are pink, changing to black, nearly half an inch long, not freely produced; 8 to 10 feet 2/6 to 3/6
- tomentosum*, a handsome shrub, with large flat clusters of white flowers in Summer; foliage turning rich bronze-red in Autumn . . . 1/6
- tomentosum plicatum* (Japanese Snowball), one of the most showy of deciduous flowering shrubs. Flowers pure white, in rounded clusters at the ends of the twigs, followed by red berries 2/6
- tomentosum plicatum grandiflora*, this is an improvement on the foregoing variety 3/6
- utile*, an evergreen with small dark shiny leaves, one of the parents of *Burkwoodii* 3/6
- WEIGELA**, free-flowering shrubs that prefer a good moist soil, flowering in November and December. The flowers in shape and size may be likened to those of a Foxglove. Generally grow to about six feet.
- bouquet rose*, flowers rose-carmine changing to red, yellow throat 1/6
- brilliant*, large bright pink 1/6
- descartes*, almost black crimson 1/6
- Eva Rathke*, dwarf, compact grower, with bright crimson flowers 1/6
- fleur de Mai*, unique carmine-pink, early flowering 1/6
- grandiflora*, very large bright pink flowers 1/6
- WISTARIA**, vigorous, free flowering, deciduous climbers of spreading habit, producing their showy racemes of pendulous flowers in early Spring. Will grow almost anywhere
- multijuga*, a superior form of the well-known Japanese noted for its enormous racemes 2/-
- multijuga rosea*, pale pink flowers 2/6
- multijuga fl. pl.*, double flowers of the above 2/6
- multijuga alba*, a pure white form of the foregoing variety . . . 2/-
- sinensis*, lavender coloured; very free-flowering and showy . . . 1/6
- sinensis alba*, pure white 2/-
- ZELKOVA** *acuminata*, a handsome tree allied to the Elm but resembling the *Nothofagus* in general appearance. It forms a graceful and wide spreading tree; beautiful Autumn colourings 3/6
